Preface : Smart City Solutions

Preface : CityOS for City Governance

What City Governance Need

- What government need is to have a system which policemen and government employees can use easily. This system must be able to display the most current information in order to support the central team to make the right city governance decisions

- Regulations and city projects are crucial for the government. There are needs in effective tools to carry on orders, support city projects, and act on emergency situations

- Annual budget for city government is usually very limited, and government needs to have balanced solutions that can save cost on equipment and labor fees while keeping everything in working order.

CHT : CityOS + Smart Pole + IVS

CityOS

Device Management

- Manage all devices
- Maintain all devices

Notifications

- Abnormal alerts
- Event notifications

Surveillance

- Live Video
- Historical Video
- Smart Recognitions

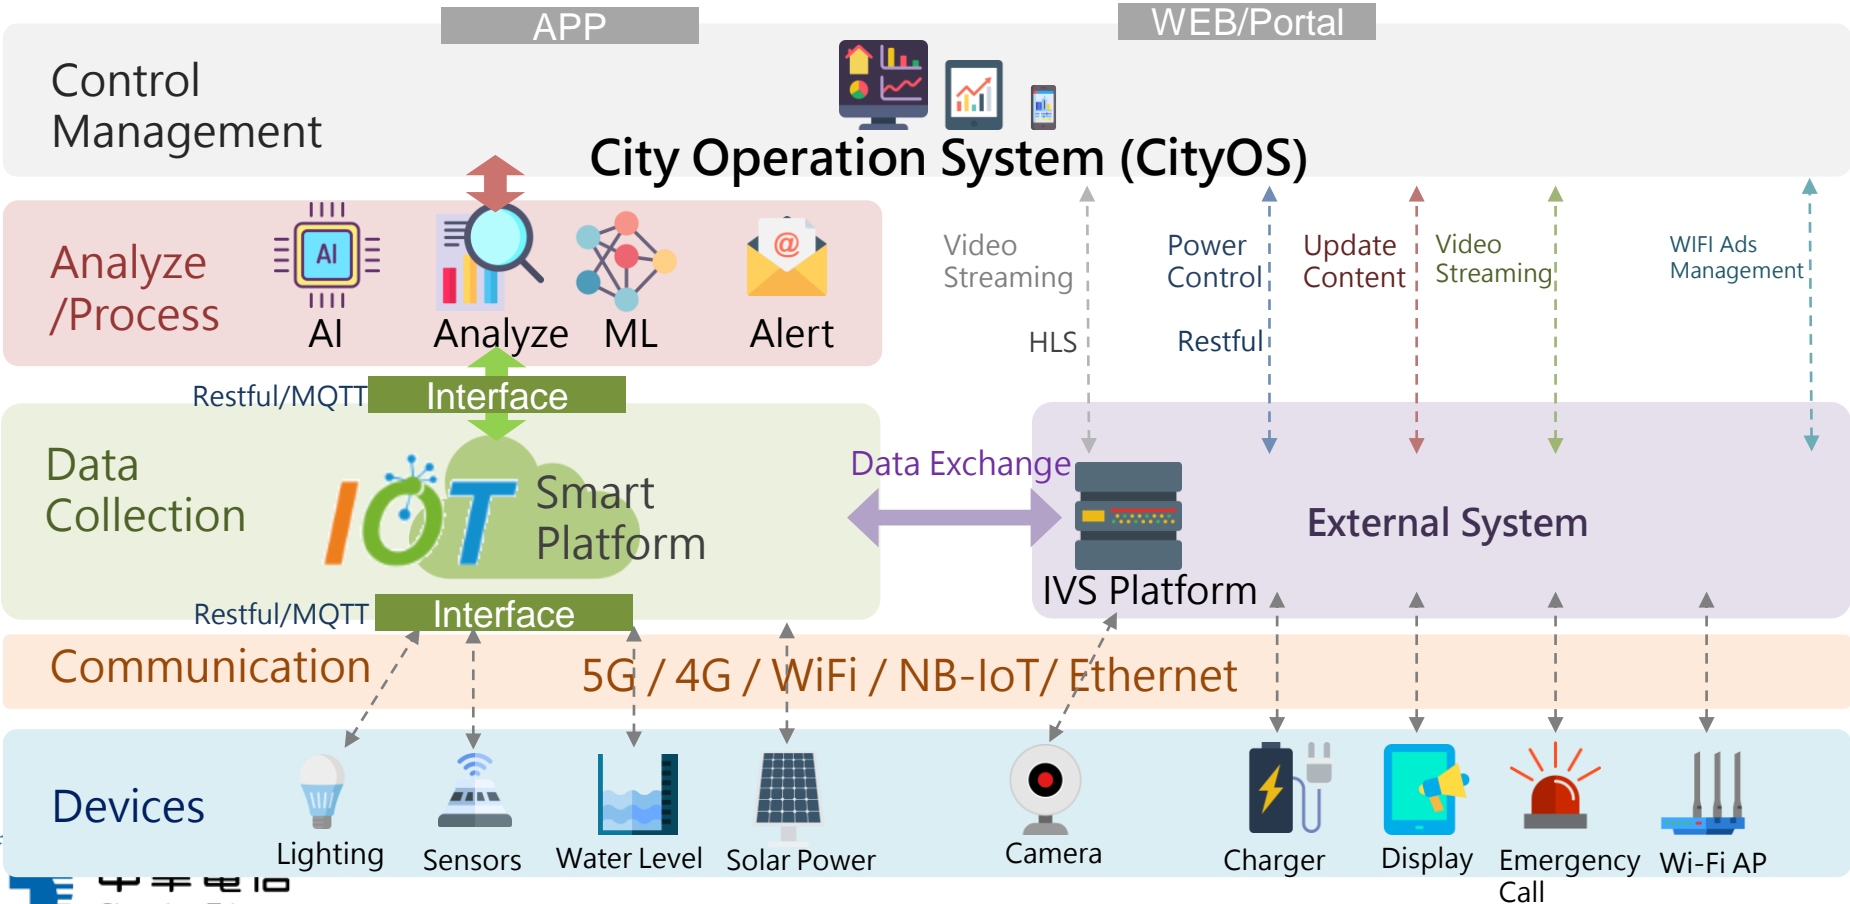

Analysis

- Big Data AI Analysis
- Machine Learning

Logic Operations

- Automatic Rule-based device operations
- Device-to-Device operations

Architecture

IoT Platform

- The IoT platform offers a simple, fast and safe service and environment, and diverse application elements and protocols. It reduces the maintenance cost of equipment connection and enhances the implementation efficiency.

Fast connection for device

Management of connection network

Information security

Smart cloud service

Development of innovation service

Smart Pole

Intelligent Lighting

- Brightness Monitoring
- Power Consumption Analysis

Video Surveillance

- Vehicle Recognition
- Human Recognition
- Item Recognition

Digital Signage

- Advertisement
- Government Messages

Charging Station

- EV Charger
- EM Battery Exchange

Weather Station

- Air Quality Monitoring
- Environment Monitoring

Wireless Network

- 4G/5G Small Cell
- Wi-Fi Hotspot

Emergency Call

- Field contact with the monitoring center

Water Level Detector

- Water level detections
- high water level alert

Solar Power

- Green Energy
- Backup Power Source

Intelligent Video System (IVS)

Video Streaming

- Support Multi-Screens
- Electronic Map Integration
- Support Looping Views

History Playback

- Support Cloud or On-Premise
- Time Selection & Screenshots
- Support Multi-Clearance Levels

Image Recognition

- Human Recognitions
- Vehicle Recognitions
- Item Recognitions

Law Enforcement

- Traffic Violation Detection
- Traffic Control Integration
- Vehicle Tracking

Smart Integrations

- Water Level Measurement
- Electronic Fence
- Smart Pole

Platform Management

- Installation Management
- Camera Diagnosis
- Repair Notifications

CityOS Benefits

1

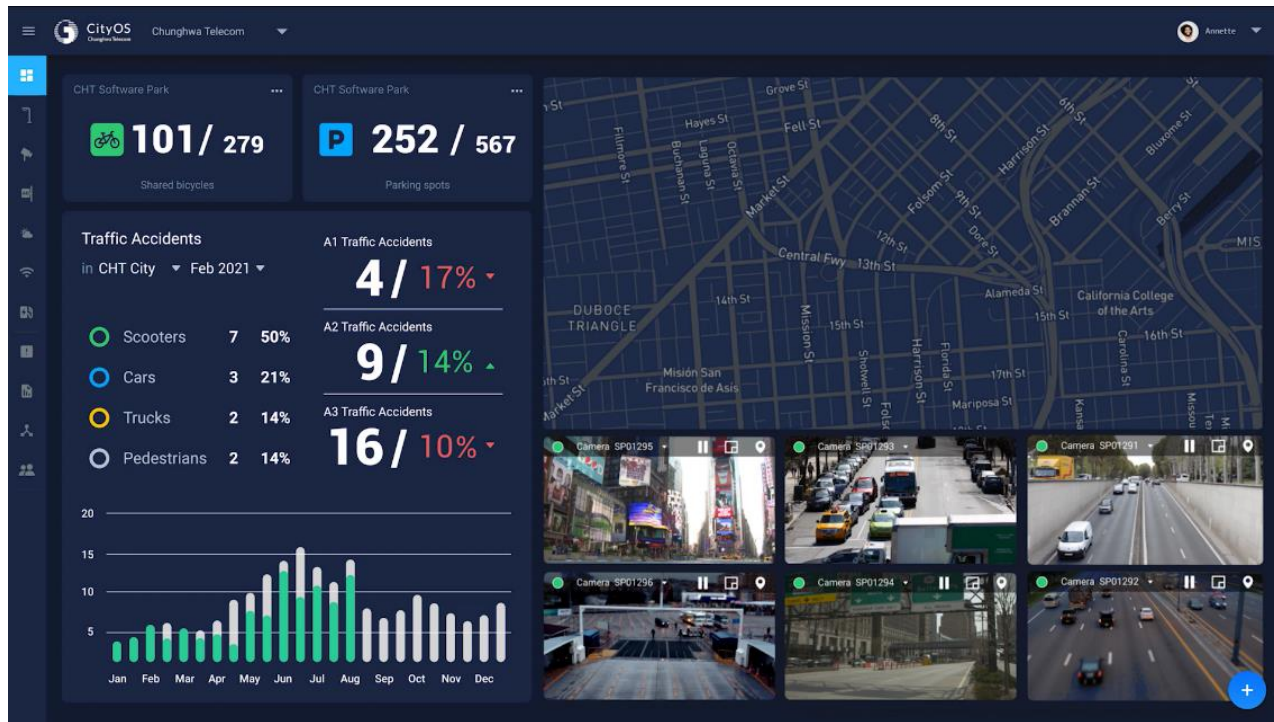

React on Real-Time Information Around the City

2

Acquire Crucial Data from Event Trigger Operations & Notifications

3

Reduce Labor by Resource & Maintenance Automation

中華電信
Chungghwa Telecom

Smart Pole Benefits

IVS Benefits

Smart City Successful Cases in Taiwan

- **Chunghwa Telecom and Tao-Yuan City Government worked together and won the first-place award in ICF smarty city forum in 2020**

Smart Poles Successful Cases in Taiwan

2016 Taoyuan Industrial Park

2017 Taoyuan QingPu Area

2018 Kaohsiung Hamasen

2017 TAF Innovation Base

2018 Tamsui Customs Wharf

2019 Hsinchu NanLui Wharf

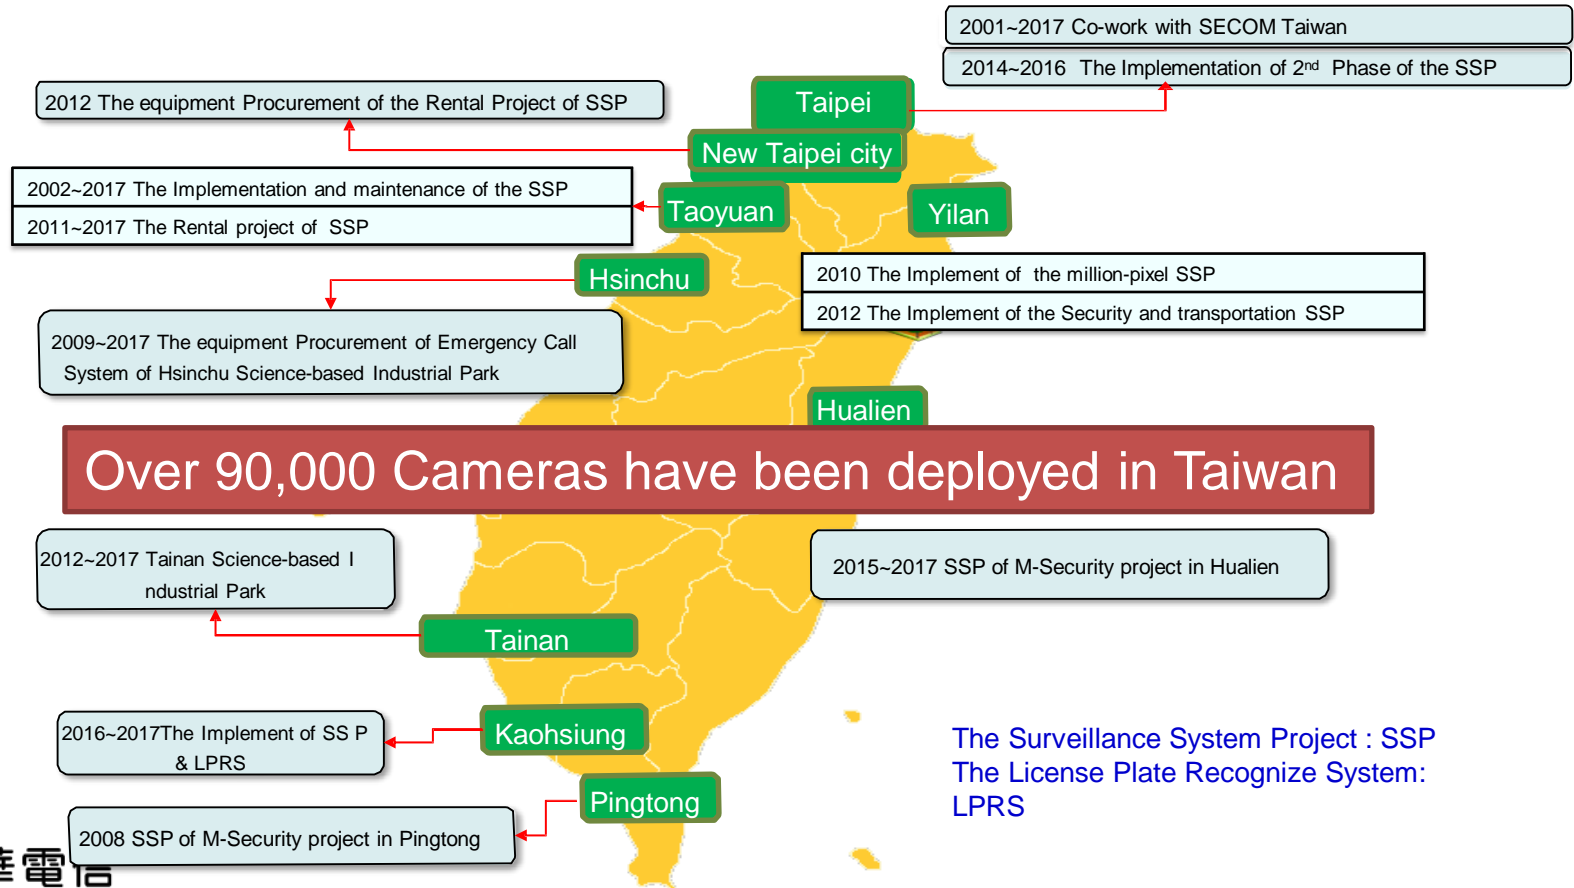

2018 Danhai light rail

2016 CHT Training Institute

IVS Successful Cases in Taiwan

Over 90,000 Cameras have been deployed in Taiwan

The Surveillance System Project : SSP
 The License Plate Recognize System:
 LPRS

Summary

- Smart Pole and IVS Solutions by Chunghwa Telecom is **Easy to Use, Effective, and Efficient** for city governance

**70%
Energy
Savings**

**Display
Important
Information**

**Enhance
Public
Safety**

**Analyze Air Data
and Detect
Pollution**

**Improve
Network
Communications**

**Major
Benefits:**

中華電信
Chunghwa Telecom

Thank You
